PROMO CODE: TYNE15

PCR Testing looks for the presence of the COVID-19 virus on a sample specimen, it is very accurate and will be able to confirm whether **anyone** is actively infected with the virus.

Travel restrictions are changing every day during the current COVID-19 pandemic situation. Many countries now require a clean COVID-19 test in order to enter through customs and immigration

Elderly or people with certain underlying medical conditions are at risk for severe illness from the virus that causes COVID-19.

Accredited and accurate this COVID-19 PCR test is 99.8% accurate with the correct sample taking technique. Fully GMP compliant and accredited laboratories delivering consistency, reliability and traceability

Results are emailed to your registered email address usually within 48 hours of posting the test. Each result will be issued on a PDF certificate of analysis.
