TYNE15

**PCR Testing** looks for the presence of the covid-19 virus on a sample specimen, it is very accurate and will be able to confirm whether **anyone is actively infected with the virus.**

**Accredited and accurate** this Covid-19 PCR test is 99.8% accurate with the correct sample taking technique. Fully GMP compliant and accredited laboratories delivering consistency, reliability, and traceability.

**Travel** restrictions are changing every day during the current covid-19 pandemic situation. Many countries now require a clean COVID 19 test in order to enter through customs and immigration.

**Results** are emailed to your registered email address usually within 48 hours of posting the test. Each result will be issued on a pdf certificate of analysis.

**Elderly or people with certain underlying medical conditions** are at increased risk of severe illness from the virus that causes COVID-19.

Ask your doctor today about  
COVID-19 testing
